Software Lifecycle
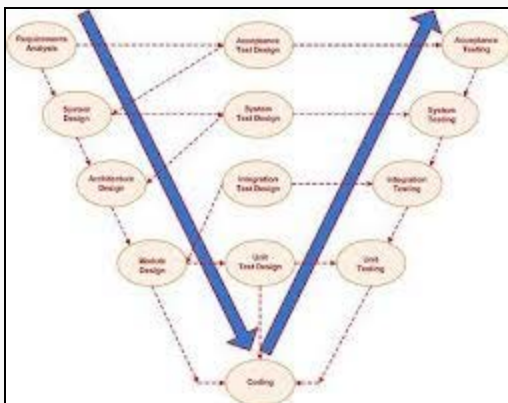

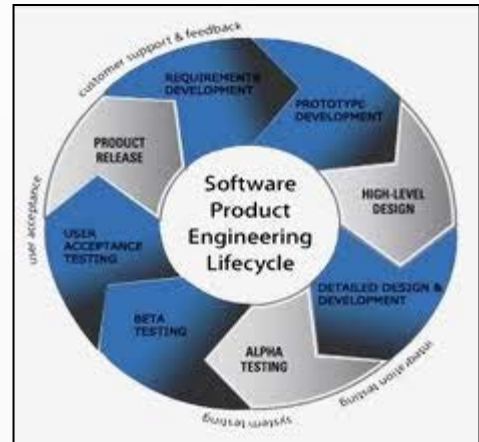

✦ **nLogic** software engineers are highly qualified throughout the fully software life cycle including requirements, design, coding, test, and documentation. Our services include integration of commercial-off-the-shelf applications; design, and development of custom applications; and deployment and maintenance. Our customers can rely on our track record of delivering high-quality software projects on time and on budget.

✦ **nLogic** provides superior software development and sustainment support services in an affordable manner.
