ILIAS Enterprise Solution

- ✦ Web-enabled application runs on a three-tier architecture with a robust and reliable technology stack and with a web-based user interface for maximum scalability and manageability.

- ✦ Operations and Training Management module provides mission forecast, planning, execution and debriefing as well as performance management.

- ✦ The Enterprise Solution is a software application designed to cover the specific requirements of a defense organization that needs to manage its resources for optimal Operational Readiness in the most cost-effective way. It supports "Mission Driven Logistics".

- ✦ Material Management module tracks identification, configuration, maintenance, inventory and procurement of material in the system, ranging from simple low cost items to high value assets with complex structures.

- ✦ Manages and optimizes the organization's materiel, personnel, budget and operations in one seamless application.

- ✦ Human Resources module supports identification, certification and training.

This software was developed by ILIAS Solutions

- ✦ Budget & Finance module tracks materials and services procurement and use against budget.
