

ILIAS Fleet Management Solution

- ◆ The Holistic Fleet Management (HFM) Solution covers the information management requirements of a military organization that needs to manage its fleet towards optimal operational readiness.
- ◆ Graphical status boards, maps, Gantt charts and mobile applications provide an intuitive user interface.

This software was developed
by ILIAS Solutions

ILIAS
smart. reliable. ready.

- ◆ Platform Identification and Configuration covers the identification of platforms in their different configurations down to the most intricate level of detail.
- ◆ Status Accounting provides a comprehensive operational and maintenance status overview, and the geographical location of the fleet per platform type and operational unit.
- ◆ Forecasting, Planning and Scheduling provides support for a multiple month horizon, over the next mission, up to the day-to-day platform assignment.
- ◆ Captures manual debriefing of the usage of platforms and their components.
- ◆ Health and Usage Monitoring System (HUMS) integration supports the upload and visualization of data for more accurate performance follow-up and predictive maintenance.
- ◆ Mobile data collection at the platform.
- ◆ Maintenance, Repair and Overhaul (MRO) provides comprehensive support for all maintenance related activities.
